

# Enhance your school design flexibility with SPECTRA-GLAZE® Walls

**A+ for Decades!** Smith & Warder, Inc., Architect and Engineers, included thousands of Spectra-Glaze® block in the initial construction of South Grand Prairie (Texas) High School in the early 1970's and continue to use Spectra-Glaze® units, in building expansions.

## **New 16" x 16" design size.**

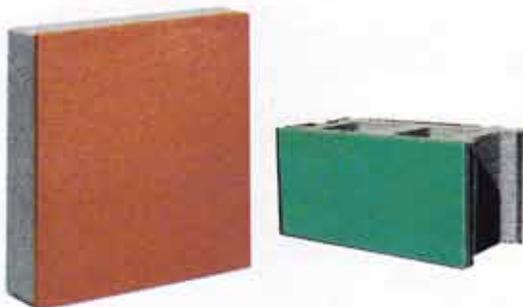

Marshal Warder, Jr. says "By using tough new Spectra-Glaze® 16"x16" units we also achieved a uniquely contemporary scale. Spectra-Glaze® integrally engraved signage and murals make sense, too; they can't come off! Spectra-Glaze® units are useful for virtually all areas in schools."

*Maple Lake (Minnesota) Elementary School, Abendroth, Rego & Young Architects, Inc.*

**Other enhancements.** Spectra-Glaze® interior and exterior school walls provide the ease, economy and toughness of modular masonry construction combined with sanitary, permanent, low maintenance surfaces in a wide range of colors, scale, pattern and textures.

**A+**   
**cost savings**  
**for decades**
