

Enhance your design flexibility
with new, inexpensive, engraved

SPECTRA-GLAZE MASONRY UNITS

Now the Spectra-Glaze face can carry messages.

Our special engraving process allows you the flexibility of selecting from our standard symbols or custom-designing your own to complement your building design. Available in mural form or individual modular units, engraved Spectra-Glaze masonry units eliminate the two-step process of building walls then attaching signs and decorative elements afterwards. Ask your local Spectra-Glaze representative for more details and samples.
